Successful Money-Making Crops Do Not Simply "Grow"--They are "Made"--Read How This Old Reliable House Takes the Risk Out of Planting and Helps You **MAKE** a Profitable Crop!

Union Plant Co.'s Facilities for Your Needs

438 Acres of Plant Beds

Picture to yourself these hundreds of acres of plants and you will get an idea of just how enormous is the production of this huge exclusive plant institution. The soil in each section is specially cultivated for the particular plant grown in that section assuring the sturdiest, most uniform plant production possible.

500,000,000 Plants Annually

Only an experienced force of plant experts operating under the most modern methods of production could handle the staggering number of plants grown and shipped by this old reliable firm annually. Over 25 persons are engaged in the production of Union Plants the year 'round, with a force of 500 workers engaged during peak periods.

Experienced Production

Years of experience have taught us just the varieties of seed to plant; scientific experimentation has taught us special methods of cultivation; interested, well-informed workers oversee production from the breaking of the ground through the final shipment of the plant.

Naturally you are interested in the price of the plants you buy, but let us urge you to consider even more thoroughly **the price you pay for the plants you raise.** On this basis you will find that Union knows no competition anywhere. We do not attempt to see how cheap we can raise plants, but we do try to see how good we can raise them. We know that if you will consider the cost of your plants on the cost of the actual number of plants raised to maturity that we can save you money. Our thousands of satisfied customers are our best sales builders.

17000 Sq. Feet Shipping Room

A huge warehouse, packing plant and shipping room are necessary to handle the tremendous volume of plants shipped by this firm annually. Union maintains an ample staff at all times to give you prompt, immediate and courteous service on your orders regardless of size.

Care in Packing Plants

A visit to our packing plant would give you a keener appreciation of Union plants. The greatest of care is taken in picking, with all weak or small plants rejected. Triple inspection, uniform size, well developed roots and hardy growth. They are then tied, the roots packed in damp moss and wrapped in wax paper to retain freshness. Scientifically built containers insure them reaching you in perfect condition, fresh from the field.

Transportation Facilities

In selecting Texarkana for a location we had in mind not only the ideal soil for our requirements but its unusual railway, express, mail, bus, truck and air transportation facilities. Shipments from Texarkana are routed direct to every section of the country in minimum time.

**MEANS TO OUR
CUSTOMERS**

Eldon, Mo., March 23, 1935.

Just a few lines to tell you our cabbage and onions were fine last year. As you know we had the worst drought we ever experienced and they survived until the late rains, then came right on and made cabbage and onions. I just don't see how they ever did it. The little onions never had a rain till late fall and I had the prettiest green onions one ever saw.

UNION
PLANTS

When you buy Union plants you do not merely buy "plants" . . . you buy **production**. By this we mean that you buy the best plants that it is possible for science and care to produce insuring the heaviest yield obtainable.

It should not be necessary to remind the experienced grower that the cost of good plants is practically nothing to the increase in yield and the elimination of gamble. Planters who value their time value UNION plants highly.

UNION PLANT COMPANY . . . TEXARKANA, ARKANSAS.

PLANTS AND FRIENDS THAT GROW

Union's *Certified* Cabbage Plants

Yield Six to Ten Tons Per Acre!

Because of our superior knowledge of the cultivation and growing of cabbage plants, and the care with which they are selected and shipped you can rest assured that you will get maximum production on your crop. Above is an actual photograph of a bunch of Union cabbage plants showing the remarkable development of roots, and moss packing which insures your receipt of fresh, strong plants.

How To Handle Union Plants Upon Arrival

If it is impossible to set the plants out the day they arrive you should uncrate them immediately, dip the roots in water, and hill out into the ground, spreading the bunches. Do not be alarmed if the plants appear wilted when you first unpack them. This is due to their having been packed and tied and does not affect their health. Set them out according to our suggestions and you will get the biggest crop you can reasonably expect. Union plants may be set out a month before home-grown plants with perfect safety and in time for the early market. Read our guarantee.

Follow These Hints For Bigger Profits

Medium low, well-drained land is best for setting out the plants. Break land thoroughly, pulverizing it, making rows 30 inches apart. Make up bed and firm it with heavy roller, setting plants 16 inches apart, well down in soil, covering entire stem up to the first leaves. Pack soil firmly around roots and stems. If stem is exposed to freeze it will split and maggots can get into the splits and eat through to the bud. Do not fertilize until two weeks before Spring weather opens. About two weeks before Spring opens throw a furrow away from plants in alternate rows with a turn plow, plowing as near plant as possible. Drill fertilizer one-half the same way. In covering fertilizer work soil under leaves of plant.

Place Your Order Now For Delivery at Any Time

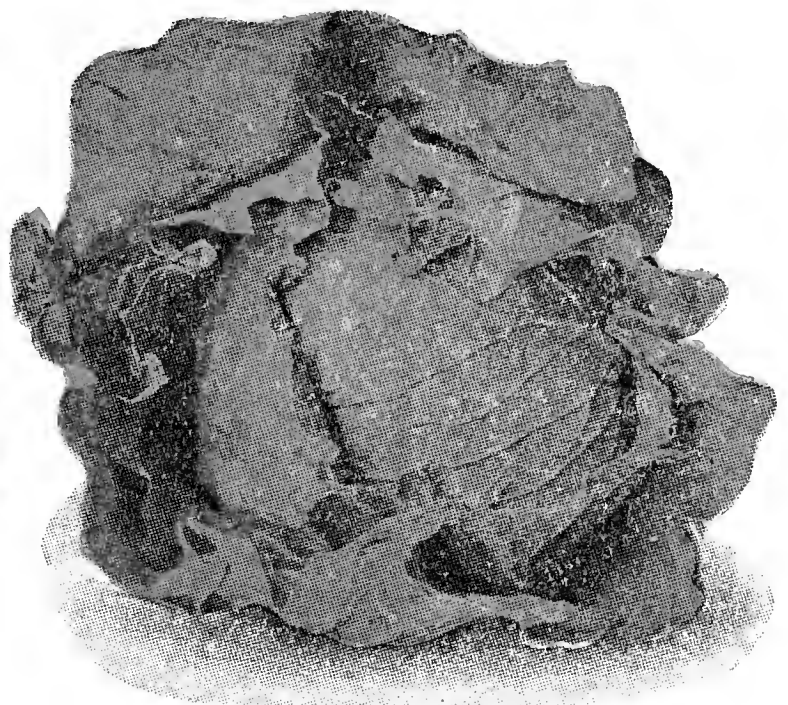

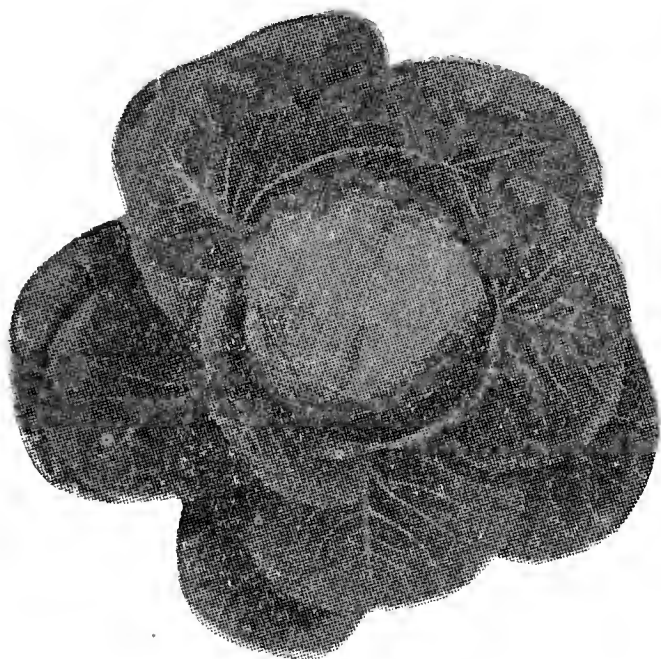

If the Spring is wet plant your beds high, if it is dry you will want a flat level bed. Follow our instructions and expect one of the biggest crops you've ever had.

There is no "guess-work" about Union plants. Get your order in early and know the satisfaction of these superior plants this year.

UNION PLANT COMPANY - - - TEXARKANA, ARKANSAS.

Thirteen *Certified* Varieties Cabbage

Every Plant Healthy and Hardy!

Choose From These Varieties and Order Now

EARLY JERSEY WAKEFIELD—An extensively used extra early variety. Small, compact, conical heads about 7 inches long. Plants small, with short stems. Used by market gardeners and large shippers. Maturity 65 to 70 days.

LARGE TYPE CHARLESTON WAKEFIELD—An extra large cabbage, excellent for home garden and truckers. Nearly a week later than Jersey Wakefield. Heart shaped heads, a half larger. Used in South for winter shipping to northern markets.

SUCCESSION—Medium late cabbage with large, flat and thick heads. Short stem. A dependable cropper of good quality. Good shipper. Well established, very desirable variety. Harvest 80 to 85 days.

COPENHAGEN MARKET—Dependably early and uniform, used largely as an early shipper. Few outer leaves, short stem. Heads round, solid and of superior quality. An excellent variety. Desirable for early kraut. Maturity 70 to 75 days.

GLORY OF ENKHUIZEN—Used largely for kraut, also by truckers and shippers. Heads large, round, solid, with few outer leaves. Excellent quality. Diameter of head around 8 inches. Maturity 80 to 85 days.

GOLDEN ACRE—Used by truckers for the earliest markets and bringing top prices. Extra early Copenhagen type, with small, round, solid heads, maturing with Jersey Wakefield. Plants small, with few outer leaves.

DANISH BALLHEAD—Most widely used and superior type of late cabbage. Heads deep, round, very hard; interior compact, leaves smooth and close. Texture tender, crisp; flavor good. Ideal for storage or shipping. Harvest 100 to 110 days.

ALL SEASON—Medium season cabbage, very popular with makers of kraut. A good keeper and shipper. Heads large, solid and of excellent quality. A good cropper, reaching harvest 85 to 90 days.

STEIN'S EARLY FLAT DUTCH—Heads very large, 11 to 12 inches in diameter, flat and solid. Very vigorous, a good second early variety. Adapted to shipping. Weight from 11 to 12 pounds. Maturity 90 days.

PREMIUM LATE LARGE FLAT DUTCH—A deservedly popular, large, late variety. Excellent for home and market garden use as well as commercial shipping. Heads extremely large, flat and solid. High quality. Harvest from 95 to 105 days.

WISCONSIN HOLLANDER NO. 8—Excellent for kraut and winter storage. Similar in type to Danish Ballhead. Will produce heavy crop on land infested with cabbage yellows and bring back large acreages lost to cabbage production because of this disease.

MARION MARKET—A development from Copenhagen Market with slightly larger round, firm heads. Valuable as an early kraut producer. Will resist infection of Cabbage Yellows.

Broccoli • Brussels Sprouts • Collards

Certified

BROCCOLI PLANTS

Very Hardy—Make Big, Firm Heads

A cultivated variety of wild cabbage with rapidly gaining popularity. Valuable addition for any grower. Similar in appearance to Cauliflower but much hardier and will withstand greater extremes of temperature. Easy to raise with Union's Certified Broccoli plants and will produce delicious firm snow-white heads.

For Your "Sure Money" Crop You Can Always Depend on Onions

Always in Demand Always Depend on Union

Give yourself a better chance to make money this year. . . . order only Union's "Certified" Plants. For years hundreds of thousands of satisfied customers have depended upon us for reliable high grade plants. Beauty of color, tough clinging skins, exceptional keeping qualities and uniformity in trueness to type characterize Union's onions.

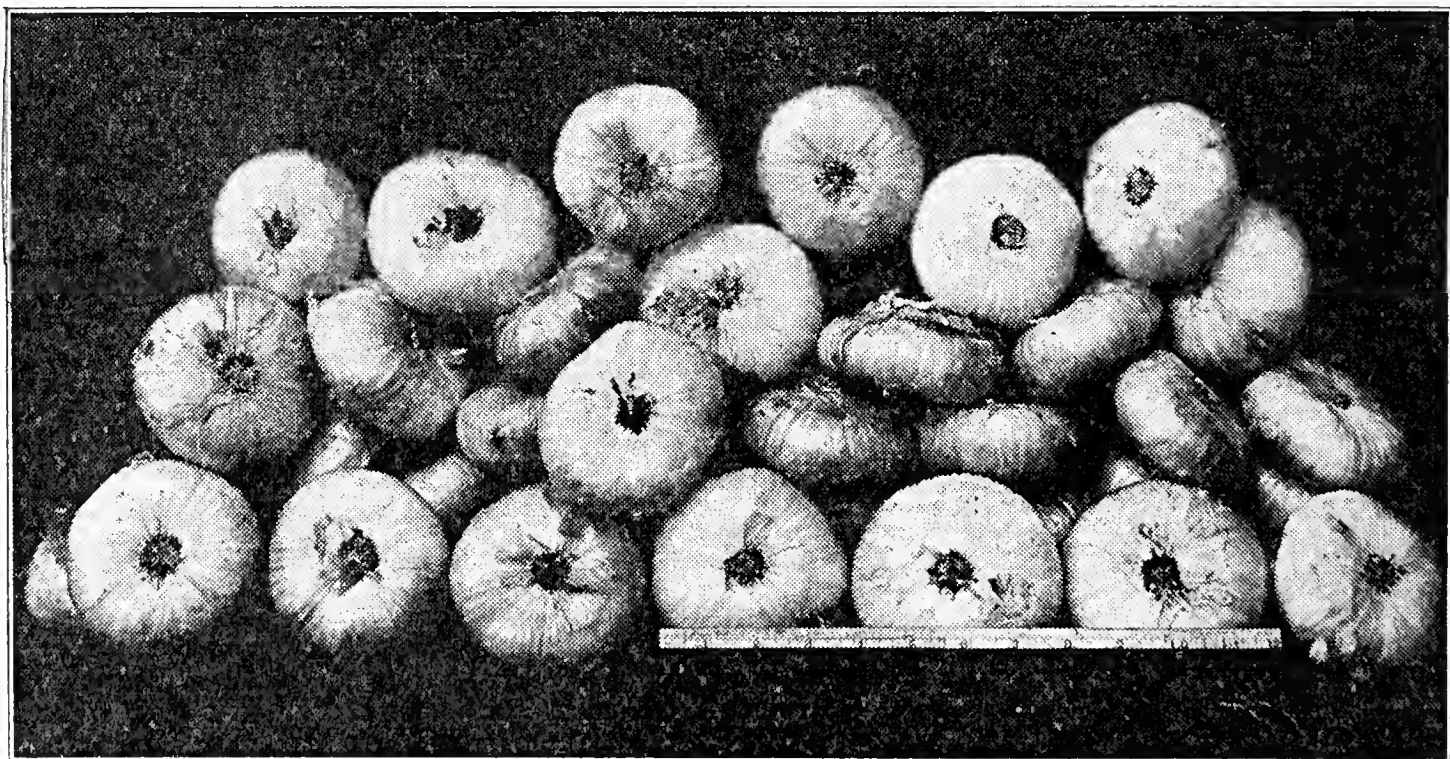

The varieties we list are in our judgment the most important sorts for home and market growers and have been carefully cultivated and bred up to high production and quality.

Union Onion Plants are OPEN-FIELD GROWN where it is cold enough to toughen them for field setting. Shipped in a special ventilated container insuring safe arrival of plants in first class condition. NO UNION PLANTS ARE WEAK, UNHEALTHY COLD STORAGE PLANTS. . . . ALL SHIPPED SAME DAY PULLED IN FIELD.

Plant Onions For Profits! : Here Is Union's Way!

Order your Union Onion Plants today. If you are not ready to plant upon arrival keep them dry and give plenty of air and they will keep. You can depend on Union's healthy plants to be heavy producers. Prepare land same as for other truck. We suggest rows 14 to 16 inches apart spacing plants 4 inches apart in row. If in dry country space rows and plants greater distance. Set plants in hole about two inches

deep, pressing dirt firmly about roots. Cultivate very shallow as roots grow near surface and should not be disturbed. The only cultivation needed is surface scratching to kill weeds. Harvest when about 60% of tops droop or are soft at neck. Pull them up and leave in sun 2 or 3 days to give tops chance to descend into onion, thereby increasing weight and firmness. Store in cool dark place after cutting tops and roots about one inch from onion and tying in bunches.

UNION PLANT COMPANY - - - TEXARKANA, ARKANSAS.

Union's *Certified* Onion Plants

LARGE—SWEET—QUICK YIELD—FOR HOME OR MARKET!

Union's "Certified" Onion Plants will make a quicker and larger yield of big saucer shaped onions with small tops. Union onions will keep better because of superiority of breeding.

BERMUDA

YELLOW BERMUDA—Very early, medium large, flat; sometimes called White Bermuda. Skin light straw color, flesh white, coarse, sweet and mild. Excellent shipper. Used extensively in Southwest for shipment to northern markets.

WHITE CRYSTAL WAX—A rather new variety. Large pure white flat onions, popular with southern onion growers. Mildest and sweetest of onions. Fine for slicing. This onion, however is not as good a keeper as the Yellow Bermuda. This is also an early onion.

Five Popular Certified Varieties

UNION PEPPER PLANTS

Easy to Grow—Very Productive

Constant Demand! Order Today—Now!

CALIFORNIA WONDER—Outstanding medium late variety for market and shipping. Vigorous, upright, big producer. Smooth, uniform and deep green, changing to bright red. Flesh thick, sweet and mild. Extremely handsome four-lobed fruit.

CHINESE GIANT—Extremely large, attractive sweet pepper for home and market garden. Fruit chunky, square ended and slightly crumpled. Deep color. Matures 140 days.

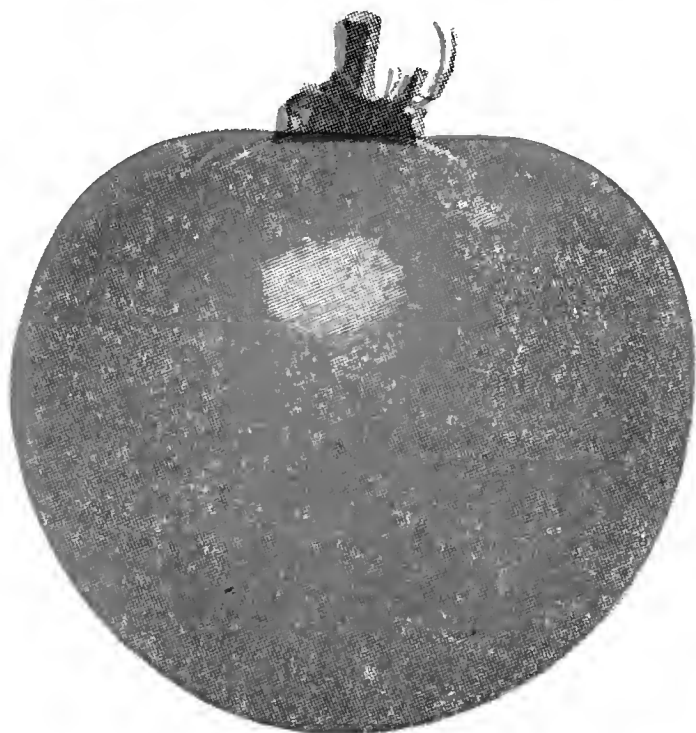

RUBY KING — Plants medium dwarf; erect, vigorous and very productive. Fruit tapering slightly. Flesh thick, mild and sweet.

BULL NOSE—Popular, early sweet; very heavy producer. Small erect plants. Fruit blunt, deep green changing to scarlet. Sweet and mild. Matures 120 days.

LONG RED CAYENNE—Favorite hot variety. Fruit slender and smooth. Used largely for canning and pickles; also for drying. Productive.

Union's *Certified* Tomato Plants

Tomatoes Always Have a Market Order Now and Be Ready to Cash In . . . Union Offers 10 Certified Varieties

GREATER BALTIMORE—Large, red, solid and round. Main crop variety. Blemish free fruits. Continuous cropper. Always dependable. Sturdy vines. Union's improved strain very desirable. **110 days.**

NEW STONE—Medium late variety. Favorite in all gardens. Very productive. Used extensively by commercial canners. Union's strain ripens evenly and is uniform. **115 Days.**

LIVINGSTON GLOBE—An excellent variety, used largely in South for shipping; well adapted to greenhouse production. Vine strong with heavy production. Fruit large, smooth, globe shaped; ripen evenly.

JUNE PINK—Earliest of pink fruited varieties. Vine open and spreading. Fruit medium size, flattened, smooth; color purplish pink. Sometimes called Pink Earliana. **90 days.**

GULF STATE MARKET—Fruit medium large, globular, smooth, pink, thick skinned, very solid and free from cracking. Excellent shipper and big producer. Vines open and medium height. **100 days.**

EARLIANA — Fruit medium large, round shaped. Very productive. Small foliage. Earliest large red smooth tomato on market. Bring top prices. Popular with packers and shippers. **90 days.**

McGEE—Especially recommended for black land. Bright crimson fruit of good flavor. Solid. Said to yield where other varieties usually fail. Excellent strain of good quality.

EARLY DETROIT—Mid-season sort used largely for winter shipping. Fruit medium large, semi-globular; smooth and solid. Heavy and highly productive plants. **110 days.**

DWARF CHAMPION OR TREE—Desirable where space is limited. Of tree type with dark leaves. Fruit medium, smooth solid, pink in color; globular, flattened.

MARGLOBE — Comparatively new strain of the main crop variety. Widely used by truckers and shippers. Vigorous, rust and wilt resistant. Fruits large, smooth, solid with thick walls and cross sections. Excellent flavor.

A Customer on Our Tomatoes—

"All plants grew to maturity in a healthy way, being very vigorous and true to record in resisting wilt and nail head rust diseases"

★ It Would Take You Three Months to Read the Thousands of Letters Like These in Our Files!

The highly valuable letters, with thou-
sands of others are in our files. Names
and addresses of the writers may be had
upon request.

Schuyler, Nebr., April 26, 1935.

Just received my cabbage plants I or-
dered from you. Must say they are won-
derful plants, so fresh and nice. I've used
the Union Plants for the last ten years and
I'll always be a booster for them as they
always give splendid satisfaction. Wishing
you success.

Grandville, Mich., Sept. 5, 1935.

We bought 310,000 cabbage plants of
you early last spring and are now drop-
ping you a line stating our complete satis-
faction. The plants arrived in very good
condition and were planted the fore part
of the month of April during very un-
favorable growing weather. We tried your
Southern Frost-Proof plants as sort of an
experiment and this is what we found:
The plants survived a sleet storm, and the
field was covered with ice for two days
and the mercury registered 19 degrees
above zero. The plants nearly all produc-
ed heads, they were very uniform in size,
none being too big. Even though cabbage
plants were cheapest in years we were
completely satisfied.

Benton, Ark., February 4, 1935.

We ordered onion and cabbage plants
from you last year. We were about the
only ones that raised any cabbage in this
neighborhood to amount to anything—and
my sweet Spanish onions were sure fine,
thanks to you and your plants.

Oskaloosa, Iowa, April 9, 1935.

Received the plants in good order Satur-
day, April 6th, and sure appreciate your
service. The plants are about the best I
have ever seen and you can count on me
